Accomplishments (Option 1)

Accomplishments | Sync.

"description of this app page"

Update

Home | Accomplishments. | goals | Physical Contact | Settings.

Update database and with current data phone gather.

add will add a task given by the doctor for the patient to complete.
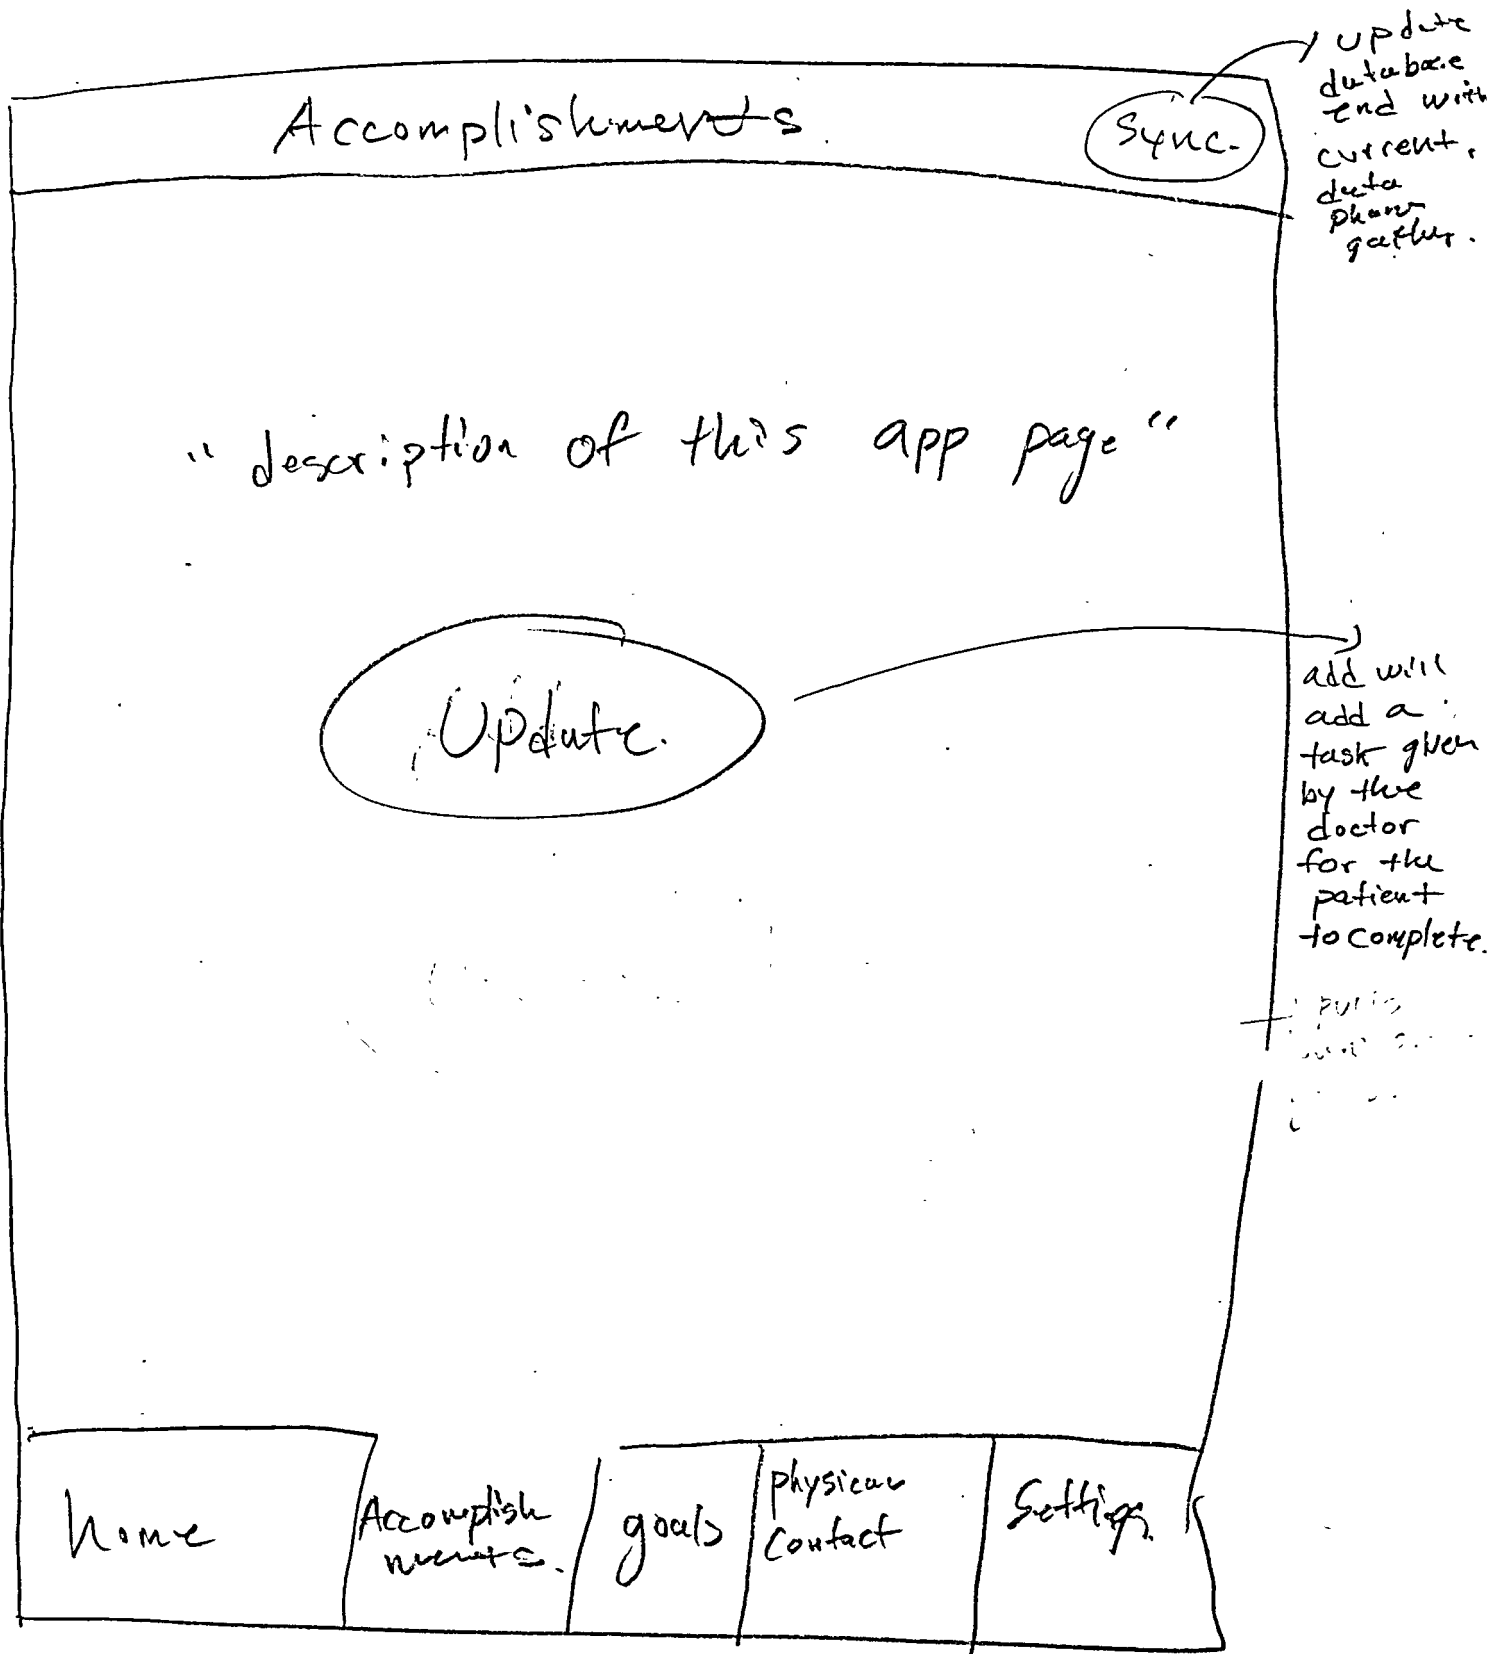

How it Works.

doctor add assign a file containing a list of what the paitient should do and upload it to a data base.

Upon pressing update, it will ask for patient login information or use the patient's login information first to use the app to pull down from the data base the file with the assignment and parse it

the accomplishment will work like the goal page.

Accomplishment after Updating

Accomplishments

I have completed a total of : _____ accomplishments

Goal I : "Name of tracker"
Goal : display goal
deadline : display deadline

progress!
display progress bar

(>)

"   "

(>) — view the more in depth info

| home | Accomplishments | Goals | physician Contact | Settings |

Accomplishment (option 2)

Accomplishment

list the goals that they have completed. and indicate the difficulty level based on an average level numbers.

Can adjust in settings to figure out how many accomplishments to

display

how frequent should it be kept.

all 100% complete goal will be taken off goals and move here.

| home | Accomplishment | goals | physician contacts | Setting. |

Goals.

"description of this app page"

Add.

| Home | accomplishments | goals | Physical Contact | Settings |

add functionality (goals)

Can either be a pop up or entire screen

Select device / Tracker

⊗ if they chose to close

Name of tracker	⟩
" "	⟩
" "	⟩

each will bring them to a goal template speficic to how the tracker is functioning and the data that it is collecting.

add functionality (goals (continue))

Device / Tracker : " Name of device / tracker "

Alternative to the

tapping Device / tracker will bring you back to a select page.

But it will be less obvious in user experience point of view.

Parameters that user can fill for the spefic device such at start date / time , end date , taken , alert or not etc.

Save

* filling in the parameters will bring out the on screen keyboard

Goal after having 1 or more task

each time tracker reach 100% increment vr 1

Goals   (+ add) (- delete)

same function as in physician contacts.

I have completed a total of :   goals

Goal 1: "Name of tracker"   Progress: display progress bar

Goal : display goal.

deadline : display deadline.

(>)

will turn in to fail if goal fails. else it will just stay at 100%.

(>)

(>)   View more indepth details about the goal.

The screen basically display all the information about the goal.

| home | accomplishment | goals | Physician contact | Settings |

this bar should stay in place when scrolling through goals.

Physician Contact
Before adding a Contact.

Physician Contact

"description of this app page"

(Add)

| home. | accomplish ments. | goals | physician Contact | Setting |

Add functionality (Physician Contact)

Can either be a pop-up or the entire screen.

Clicking will allow camera link to select picture

if they choose to close

add Picture

Name :

Contact :

Area of Speciality :

location :

Make these boxs even length

Save

Edit button will bring up the exact thing as this one but should the parameters be filled in with existing data.

& filling out parameters will bring up on screen keyboard.

Physician Contact (after adding 1 specific contact)

Physician Contact   (+ add) (- delete)

Physician's picture (creepy but a possibility)

(Edit)

Name: _____

Contact: _____

Area of Specility: _____

location: _____

| Home | accomplishments | goals | Physician Contact | Settings |

tapping the delete button will gray out the different frames and replace the edit button with a (−)

↑ tapping that will remove the data from the app.
